ART RADIO

▶ Software Suite

Radio Automation Software made by Playout and Media Manager with Music and Events Scheduler for Adverts/Programs/News.
The Playout manages Music Player and dedicated Events Player, Device Manager (to map external devices), Remote Live Service, IP Commands, User Management and Playout Extentions (HotKey Player, Live Recorder, Live Mix Editor, Cart Player) for Live Programs.

RADIO PLAYOUT

The music sequence can be created by assigning unlimited playlist based on song filters or creating a full schedule using the Advanced Scheduler.

- Supports the most common audio formats (wav, mp2, mp3, mp4, aac, ogg, wma, flac)
- Easy to use Drag and Drop to play file
- Manual and Automatic Mode
- Ciclic Playlist for everyday schedule
- Day by day Clock Schedule
- Advanced Scheduling
- Play Database Files
- Play Files from your External Devices
- Search&Play your Favourites Files
- Pre-Listen Function

DATA MANAGER

The Data Manager is a Software dedicated to the Assets Management. Divided in Macro Sections such as SONGS, JINGLES, NEWS, PROGRAMS and COMMERCIALS allow users to manage correctly every database file. It's also possible to manage different Database Channels from one Workstation. A basic Playlist and Event Scheduler is included on this application.

ADVANCED ASSETS SCHEDULER

Advanced Scheduler for Radio & TV Automation Softwares that allow the creation of Clocks and Templates for the Stations Daily/Weekly or a Long-Term Scheduling. Rules and Filters for Music Scheduling, Time Markers, Personalized Clock Duration and Numbers, Different Play-Mode for VoiceOver and Jingles. Automatic Removal of exces Clock Elements for a better Auto-Alignment of the Music Scheduling.
